Blackout Flock

This high-tech fabric is treated with a special blackout coating and can be printed from both sides with solvent inks. The blackout coating is topped with a cotton flock which gives the fabric a very soft handle. Further, the matt finish of the fabric results in a very low level of light reflection. The coating is identical on both sides so that Blackout Flock achieves a high quality print on both sides. The fabric is flame retardant and available in XXL size.

Application:

- suitable for all applications where no light must shine through the fabric like solar protection, shop windows, exhibition booth partitions, etc.

Composition:

- 100% polyester textile
- special blackout coating, topped with cotton flock

Technical Specifications:

- weight: approx. 320 g/m²
- width: 310 cm
- core : 3 inch
- flame retardant certificates: B1 and M1
- tear strength: warp > 670 (N/5cm)
weft > 430 (N/5cm)

Digital Print:

- new article which is still in the test phase

Confection:

- cold and hot cut
- sewing/hemming possible as well as placing eyelets
- can be used in all conventional display systems
