

# Our Policies: Responsible Procurement

This policy outlines Roseash Ltd t/a DPM's commitment to sustainable procurement, ensuring that all goods and services are sourced in a way that minimises negative environmental impact, promotes social responsibility, and supports ethical business practices. Our goal is to leverage procurement as a tool for positive change, aligning with our corporate values and contributing to the global goals of sustainability.

## Key Principles

### Environmental Sustainability

Prioritise suppliers who offer environmentally friendly products and services, including those with reduced packaging, energy-efficient operations, and lower carbon footprints. Implement product life cycle analysis to evaluate the long-term environmental impact of purchases.

### Social Responsibility

Ensure that suppliers comply with fair labour practices, respect human rights, and maintain safe working conditions. This includes avoiding suppliers involved in modern slavery, child labour, or unsafe working.

### Ethical Business Practices

Conduct business with suppliers who demonstrate high ethical standards, including transparent supply chains, anti-corruption measures, and a commitment to fair trade.

## Implementation Framework

### Supplier Evaluation

Before entering into contracts, suppliers will be assessed based on their environmental impact, social responsibility, and ethical standards. This will include requesting evidence of relevant certifications (e.g., ISO 14001 for environmental management or Fair-trade certification)

### Life Cycle Analysis

Implement life cycle assessments to understand the long-term environmental impact of key products and services, ensuring the reduction of carbon footprints and resource consumption.

### Collaboration and Education

Work with suppliers to promote best practices in sustainability. Provide training to internal teams to ensure they understand the importance of responsible procurement, and maintain ongoing communication with suppliers to ensure continuous improvement.

# Our Policies: Responsible Procurement

## Monitoring and Reporting

Regularly monitor supplier performance against established sustainability criteria and publish annual reports on progress. This transparency will ensure accountability and allow for continuous improvement.

## Compliance

All suppliers must adhere to this policy as a condition of doing business with Roseash Ltd. Non-compliance will result in either corrective action plans or termination of business relationships, depending on the severity of the violation.

This policy will be reviewed annually to ensure it reflects current best practices and continues to align with Roseash's sustainability goals.

Implementing this framework will not only contribute to environmental and social well-being but also foster strong, ethical supplier relationships, driving long-term business success.
